

Tripus fusus

Kingdom	Chromista
Class	Dinophyceae
Genus	Tripus
Species	fusus
Authority	(Ehrenberg) F.Gómez 2013

Description

Syn. *Ceratium fusus*

Plate formula; Po, cp, 4', 6'', 5c, 2+s, 6''', 2''''

Phototrophic cells with well-developed theca. Cell body fusiform. Apical horn and left antapical horns are fully developed whereas the right antapical horn is rudimentary. The epitheca tapers into an antapical horn that is lightly curved. The antapical horns are closed.

Size; 15-30 µm wide, 150-300 long.

Distribution; Cosmopolitan
